This volume, part of an editorial project that will eventually encompass all books of the OT, provides the MT of the Book of Numbers with an interlinear Italian translation. In addition, R. gives the translation of Numbers from the official Italian Catholic biblical translation, the so-called CEI, at the foot of each page for purposes of comparison with his own interlinear rendition (cases of divergence between the two, due, e.g., to the CEI's following the LXX rather than the MT in a given instance, are indicated by means of underlining of the relevant CEI text-elements).—C.T.B.
